## FRONT-END DEVELOPER

Though I have a Bachelor degree in Physics,my passion for coding always pushes me to the modern day tech industry. I started my programming journey by learning with C and C++. Then I did some Arduino projects and also joined a few line follower contests as a hobbyist. After a while, I started working with front end web technology, jQuery, API Integration, ReactJS etc. As a self taught programmer, learning new tech stacks and implementing them with best practices is familiar for me. I am a teamplayer and linux lover.

## PROJECTS

### Covid-19 Reports Worldwide

[App](#), [Source Code](#)

An web app, for showing the reports of Covid-19 all over the world.

**Stack:** ReactJS,CSS,Material-UI,ChartJs

- Total info cards: cases, deaths, recoveries.
